

REMOVING AND REPLACING THE ABCOASTER® CARRIAGE

It may be necessary to remove the AbCoaster Carriage in different models at time (such as to replace the rollers inside the carriage). This can be done a couple of different ways depending on the age of the unit.

On our newer CS3000s (Serial Numbers starting with ABS) simply require that you remove the rear bumpers from the back of the rails and the carriage will slide off the back of the unit.

Complete any work needed on the carriage and reverse the steps to replace the carriage being sure to orient the carriage (there is a front and a back) correctly when re-assembling. The two lower guide rollers should be to the front of the carriage and the rubber coated posts in place to contact the rear rail bumpers.

For older units, home units, and all CS1500 units, you will need to follow these directions.

The Rail Bumpers mount points do not allow for easy removal off the back of the machine for the units listed above. You will need to remove the bolts holding the upper rail mount to the front frame and the rail support bar from its mounting point as well. Once the front frame is free of the rail assembly the carriage will slide cleanly off the top of the rails and can be maneuvered on easily on its own.

Complete any work needed on the carriage and reverse the steps to replace the carriage being sure to orient the carriage (there is a front and a back) correctly when re-assembling. The two lower guide rollers should be to the front of the carriage and the rubber coated posts in place to contact the rear rail bumpers.

If there are questions during an install for a tech, PLEASE do not hesitate to call us and discuss! We are happy to assist and make sure that every install goes smoothly. We are happy to hop on FaceTime or Zoom and video chat to make sure things are set up correctly. Just call 866-219-5335 Option 5 and we can set up a video conference.
