## **CAUTION**

Read all precautions and instructions in the manual before using this equipment.

# IMPORTANT SAFETY INSTRUCTIONS

Before beginning any fitness program, you should obtain a complete physical examination from your physician. When using exercise equipment, basic precautions should always be taken, including the following:

1. Read all instructions before using the equipment. These instructions are written to ensure your safety and to protect the unit.
2. Use the equipment only for its intended purpose as described in this guide. Do not use accessory attachments that are not recommended by the manufacturer, as such attachments might cause injuries.
3. The product should only be used on a level surface and with 0.5 meters space around the product. Do not store the equipment outdoors.
4. The equipment is not intended for use by children under the age of 16. Children over the age of 16 should use the equipment with adult supervision.
5. Do not overexert yourself or work to exhaustion. Do not attempt to lift more weight than you can control safely. If you feel any pain or abnormal symptoms, stop your workout immediately and consult your physician.
6. This equipment is not intended to be used as or with medical apparatus/instruments.
7. Never operate the unit when it has been dropped or damaged. Never drop or insert anything into any opening in the equipment. Always check the unit and its cables before each use. Make sure that all fasteners and cables are secure and in good working condition. Frayed or worn cables can be dangerous and may cause injury. Periodically check these cables for any indication of wear. Keep hands, limbs, loose clothing and long hair well out of the way of moving parts.
8. Be careful when getting on or off the equipment.
9. Wear proper exercise clothing and shoes for your workout, no loose clothing.

## **Personal Safety During Assembly**

Read each step in the assembly instructions and follow the steps in sequence. Do not skip ahead. If you skip ahead, you may learn later that you have to disassemble components and that you may have damaged the equipment.

Assemble and operate the equipment on a solid, level surface. Locate the unit a few feet from walls or furniture to provide easy access. The equipment is designed for your enjoyment, and by following these precautions, we believe you will enjoy your new equipment and the many benefits it will provide.

# INSTRUCTIONS

Before beginning assembly, please take the time to read instructions thoroughly. Please use the various lists in this manual to make sure that all parts have been included in your shipment. If parts are found to be missing, please contact either your authorized dealer or us directly and reference the part name and number from the parts list. Use only our replacement part when servicing. Failure to do so will void your warranty and could result in personal injury.

The equipment is designed to provide the smoothest, most effective exercise motion possible. After assembly, you should check all functions to ensure correct operation. If you experience problems, first recheck the assembly instructions to locate any possible errors made during assembly. If you are unable to correct the problem, call your authorized dealer or contact us directly to continue troubleshooting. Be sure to have the serial number, related part names and numbers and your manual handy when calling. Do not continue assembly, or use the equipment until all parts have been accounted for and troubleshooting is complete.

# ASSEMBLY INSTRUCTION

Assembly of the equipment takes professional installers about 1.5 hours. If this is the first time you have assembled this type of equipment, plan to spend more time. If you are in doubt about any part of this assembly, we recommend you contact a professional installer to complete the assembly. You may find it quicker, safer, and easier to assemble this equipment with the help of an assistant, as some components may be large, heavy or awkward to handle alone. It is important that you assemble your product in a clean, clear, uncluttered area. This will enable you to move around the product while you are fitting components and reduce the possibility of injury during assembly or damage to the area or equipment.

## Note

As with any assembled part, proper alignment and adjustment is critical. While tightening the fasteners, be sure to leave room for adjustments. Do not fully tighten the fasteners until instructed to do so. Be careful to assemble the components in the sequence presented in this guide.

### Training Area and Free Area

112 in / 44 cm

### Free Area

Please allow for free area beyond the training area of 24 in / 60 cm on all sides of the unit to ensure that the training area is not impeded.

### Specifications

Maximum Wt. Capacity: 440 lbs / 200 kg

Maximum User Weight: 550 lbs / 250 kg

Product Total Surface: 20.5\*27.5 in / 52\*70 cm

# ASSEMBLY

## ● STEP 1

1. Attach both of the Handles (#5) to the base frame (#1) on either side using:
  - 2 M4\*10 Hex Bolts (#22)
  - 2 flat Washers  $\Phi 9 \times \Phi 16 \times 1.6$  (#17)
  - 2 M8 Cap Nuts (#21)
2. Attach the desired level of resistance bands to both sides of the unit at the Anchor Peg (#4) and either side of the belt Assembly.

**Note: Tighten all connections from Step 1.**

# How To Use

Confirm the resistance bands are clipped over the front anchor point and closed at the belt end as well.

Grasp handles firmly and confirm that the unit is sitting level.

Always keep feet flat on the platform and knees close together.

Buckle the belt and rest securely in your hip crease (adjust slightly based on comfort).

While maintaining a firm grip on the unit, thrust your hips upwards against the belt.

NEVER use any band that is damaged or shows any signs of wear.

Scan the QR code above to learn more.

**A fitness facility should have a regular maintenance schedule in place that this equipment can be added into. For personal, in home use, please follow the home maintenance schedule listed above.**

# GENERAL MAINTENANCE INFORMATION

## **Links, Pull-Pins, Snap Hooks, Swivels, Weight Stack Pins:**

- Check all pieces for signs of visible wear or damage.
- Check springs in snap hooks and pull-pins for proper tension and alignment.
- If the spring sticks or has lost its rigidity, replace it immediately.

## **Upholstery:**

- To ensure prolonged upholstery life and proper hygiene, all upholstered pads should be wiped down with a damp cloth after every workout.
- Periodically take the time to use a mild soap or an approved vinyl upholstery cleaner to deter the onset of cracking or drying. Avoid using any abrasive cleaners or cleaners not intended for use on vinyl.
- Replace ripped or worn upholstery immediately.
- Keep sharp or pointed objects clear of all upholstery.

## **Decals:**

- Inspect and familiarize yourself with any safety warnings or other user information posted on each unit.

## **Nuts and Bolts:**

- Inspect all nuts and bolts for any loosening and tighten if needed.
- Go through a re-tightening sequence periodically to ensure that all hardware is tensioned properly.

## **Anti-Skid Surfaces:**

- These surfaces are designed to supply secure footing and need to be replaced if they appear worn or become slippery.

## **Belts and Cables:**

- Visually inspect the belts and cables for fraying, cracking, peeling, or discoloration.
- While the machine is not in use, carefully run your fingers along the belt or cable to feel for thinning or bulging areas.
- Replace belts and cables immediately at the first signs of damage or wear. Do not use equipment until belts or cables have been replaced.

## **Belt and Cable Tension:**

- Referring to the Owners Manual, when belts or cables are used check all bolts attachments to be sure they are properly attached.
- Check slack in cables and re-adjust cable tension if needed.

## **Seat Sleeves, Guide Rods:**

- Before applying lubricant, wipe down applicable parts with a dust free rag.
- Lubricate seat sleeves and Guide Rods with a Silicon or Teflon based lubricant spray.

## **Linear Bearings:**

- Referring to the Owners Manual carefully disassemble the bearing from its housing and place a finger full of light grease (lithium, super lube, etc.) into the inside of the bearing. Using your finger, press the grease into the ball-bearings and their tracks. Repeat until the ball-bearing tracks are full of grease. Insert the shaft back into the bearing and wipe off excess grease.

**PLEASE KEEP THIS FOR YOUR RECORDS**

# TRAINING TIPS

Use this manual to guide you through the basic exercises you can perform on your equipment. To gain maximum results and avoid possible injury, consult a fitness professional to develop your complete exercise program.

Always consult your physician before starting any exercise program.

To be successful in your exercise program, it is important to develop an understanding of the basic principles of strength training. Now that you have your equipment, it is only natural that you want to get started immediately. First, determine a set of realistic goals and objectives for yourself. By deciding on an exercise plan that is right for you prior to starting, you will contribute significantly to your success.

Warm up properly before engaging in weight resistance training. Stretching, yoga, jogging, calisthenics or other cardiovascular exercise can help prepare your body for the heavier workload of lifting weights.

Learn how to perform the exercise correctly before using heavy weight. Correct form is important to avoid injury and to ensure that you work the proper muscle groups.

Know your limitations. If you are new to weight training or are embarking on an exercise regimen after a long layoff, start slowly and build foundational strength over a longer period of time.

Pay attention to your breathing. Exhale when you exert is a general rule of thumb. Never hold your breath.

# Manufacturer's Limited Warranty

The manufacturer warrants that your Cali Lift™ is free of defect in materials and workmanship and will, at its option, repair or replace any defective Cali Lift™ that is returned to it. Except as described in the following sentence, all parts and components of the Cali Lift™ are warranted from the original date of purchase as below:

Frame - 2 years

All other parts - 1 year

Resistance Bands - 6 months

This warranty is valid only in accordance with the condition set forth below:

1. Normal wear and tear (including lost parts) are not covered by this warranty.
2. The warranty extends only to the original consumer purchaser and is not transferable. In addition, proof of purchase must be demonstrated. This warranty is void if the product has been subject to accident, misuse, abuse, improper maintenance or repair or unauthorized modification.
3. This limited warranty is the only written or express warranty given by the manufacturer. Any implied warranty of merchantability of fitness for a particular purpose on this product is limited in duration to the duration of this warranty. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.
4. Repair or replacement of the product (or, if repair or replacement is not feasible, a refund of the purchase price) is the exclusive remedy of the consumer under this warranty. The manufacturer reserves the right to remedy any warranty claims via parts and repair prior to replacement. The manufacturer shall not be liable for any incidental or consequential damages for breach of this warranty or any implied warranty on this product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
5. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Procedure for Warranty Repairs or Replacement:

If warranty service is necessary, the original purchaser must either call or email for instructions.

Proof of Purchase will be required for all warranty claims.
